Which customers will purchase a quoted insurance plan?

Before asking someone on a date or skydiving, it's important to know your likelihood of success. The same goes for quoting home insurance prices to a potential customer. [Homesite](#), a leading provider of homeowners insurance, does not currently have a dynamic conversion rate model that can give them confidence a quoted price will lead to a purchase.

Using an anonymized database of information on customer and sales activity, including property and coverage information, Homesite is challenging you to predict which customers will purchase a given quote. Accurately predicting conversion would help Homesite better understand the impact of proposed pricing changes and maintain an ideal portfolio of customer segments.

Started: 7:29 pm, Monday 9 November 2015 UTC

Ends: 11:59 pm, Monday 8 February 2016 UTC (91 total days)
